

Pathway

- arginine biosynthetic process
- arginine metabolic process
- glutamine family amino acid biosynthetic process
- small molecule biosynthetic process
- glutamine family amino acid metabolic process
- organic acid biosynthetic process
- carboxylic acid biosynthetic process
- nitrogen cycle metabolic process
- alpha-amino acid biosynthetic process
- cellular amino acid biosynthetic process
- alpha-amino acid metabolic process
- carboxylic acid metabolic process
- cellular amino acid metabolic process
- oxoacid metabolic process
- organic acid metabolic process
- transaminase activity
- transferase activity, transferring nitrogenous groups
- Arginine biosynthesis
- Biosynthesis of amino acids
- Alanine, aspartate and glutamate metabolism
- 2-Oxocarboxylic acid metabolism

Pathway

- ergosterol biosynthetic process
- phytosteroid biosynthetic process
- cellular alcohol biosynthetic process
- cellular lipid biosynthetic process
- secondary alcohol biosynthetic process
- ergosterol metabolic process
- phytosteroid metabolic process
- sterol biosynthetic process
- steroid biosynthetic process
- cellular alcohol metabolic process
- secondary alcohol metabolic process
- sterol metabolic process
- steroid metabolic process
- purine nucleotide metabolic process
- nucleotide metabolic process
- nucleoside phosphate metabolic process
- purine-containing compound metabolic process
- nucleobase-containing small molecule metabolic process
- alcohol biosynthetic process
- purine ribonucleotide metabolic process
- organophosphate metabolic process
- ribonucleotide metabolic process
- organic hydroxy compound biosynthetic process
- ribose phosphate metabolic process
- organic acid metabolic process
- lipid biosynthetic process
- carboxylic acid metabolic process
- cellular lipid metabolic process
- oxoacid metabolic process
- oxidation-reduction process
- IMP biosynthetic process
- isoprenoid metabolic process
- isoprenoid biosynthetic process
- lipid metabolic process
- alcohol metabolic process
- IMP metabolic process
- organic hydroxy compound metabolic process
- carbohydrate derivative metabolic process
- alpha-amino acid metabolic process
- purine-containing compound biosynthetic process
- serine family amino acid metabolic process
- one-carbon metabolic process
- organophosphate biosynthetic process
- nucleotide biosynthetic process
- nucleoside phosphate biosynthetic process
- ADP metabolic process
- purine nucleotide biosynthetic process
- purine nucleoside diphosphate metabolic process
- purine ribonucleoside diphosphate metabolic process
- ribonucleoside diphosphate metabolic process
- purine nucleoside monophosphate biosynthetic process
- purine ribonucleoside monophosphate biosynthetic process
- acetyl-CoA metabolic process
- nucleoside diphosphate metabolic process
- purine nucleoside monophosphate metabolic process
- purine ribonucleoside monophosphate metabolic process
- nucleotide phosphorylation
- fungal-type cell wall
- extracellular region
- cell wall
- external encapsulating structure
- anchored component of membrane
- oxidoreductase activity
- structural constituent of cell wall
- oxidoreductase activity, acting on the CH-NH group of donors, NAD or NADP as electron acceptor
- oxidoreductase activity, acting on the CH-NH group of donors
- ligase activity, forming carbon-nitrogen bonds
- Biosynthesis of secondary metabolites
- Steroid biosynthesis
- Terpenoid backbone biosynthesis
- Purine metabolism
- Carbon metabolism
- Glycine, serine and threonine metabolism
- One carbon pool by folate
- Methane metabolism
- Biosynthesis of amino acids
- Glycolysis / Gluconeogenesis
- Cysteine and methionine metabolism
